Long Life  
Energy Efficient  
Helps reduce fatigue  
Improves concentration  
Provides greater visual clarity  
Save \$45 or more in energy cost  
(Savings based on comparison to incandescent bulbs at 10 cents per kWh)

Full Color Spectrum light is like natural sunshine. It has the beautiful wavelengths of color of a rainbow. Standard indoor light is distorted and unbalanced; it has too much stressful yellow-orange and too little calming blue. Our eyes see yellow as the brightest color, even glaring, but our eyes actually see better with blue.

Outdoor sunshine is 100 CRI 5300 K Indoor Sunshine is 95 CRI 5300 K

Safe for fixtures that say 40 Watt Max  
Not for use with dimmer switches

*Love it or your money back. Guaranteed.*
